Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9

Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
// You are using Java
import java.util.*;
class Main{
  public static void main(String args[]){
  Scanner sc=new Scanner(System.in);
  int a=sc.nextInt();
  int[][] n=new int[a][a];
  int mainDiaSum=0;
  int secDiaSum=0;
  for(int i=0;i<a;i++){
     for(int j=0;j<a;j++){
        n[i][j]=sc.nextInt();
     }
  }
  for (int i = 0; i < a; i++) {
        mainDiaSum += n[i][i];
        secDiaSum += n[i][a - 1 - i];
     }
```

```
    System.out.println("Sum of the main diagonal: "+mainDiaSum);
    System.out.print("Sum of the secondary diagonal: "+secDiaSum);

  }
}
```

Status : Correct *Marks : 10/10*
